INDEX TO THE MOSELEY MAP OF NORTH CAROLINA, 1733

Every entry appearing on the Moseley Map of 1733 is included in the following index. A grid reference, based on the latitude marks already existing on the map and longitude marks three inches apart, has been assigned to each entry (e.g. A1, B8). The blocks thus created are lettered from A to I down the side of the map, and numbered from 1 to 10 across the map. The reference assigned corresponds to the block in which the first letter of the entry appears. If the entry begins on a line of the grid it is considered to be in the block where the major portion falls.

By and large the spellings of the alphabetized entries in this index are as they appear on the map. Modern spellings and name have not been included. Certain terms, such as creek, inlet and river, have in some instances been expanded to avoid confusion. When a name appears more than once, although not in the same place, the references have been combined.

Groupings of similar entries have been made where possible (e.g., creeks, plantations, towns, rivers) and the grouped entry printed in bold. When a name appears with a single dot as an indicator of its location and it cannot be determined whether or not it is a town or settlement, it is placed in the plantations group. When the proper group of a term could not be determined with relative certainty, it was not placed in any group. When a word is printed in brackets, the information in the brackets merely clarifies an unusual abbreviation. If [reference to] appears after an entry, the term is referred to in the corresponding block but does not itself appear in the block. The directions for the navigation of Ocacock Inlet have been indexed as a whole. There are approximately 820 main entries.
